

Lead QA Engineer

Naviance, Inc. has an opening in Arlington, Virginia for a Lead QA Engineer.

Maintain QA processes, utilizing best practices in testing and test automation and ensuring a high standard of quality in new product releases. Collaborates with user experience team, Business Analysts, Software Engineers and UI Developers. Conducts product testing to ensure a quality release. Develops test plans and automated test scripts. Collaborates with other members of QA team to implement automated testing processes. Helps improve best practices in quality assurance.

Must possess at least a bachelor's or its equivalent in Computer Science, Engineering or a related field and at least five years of progressive work experience in Software Quality Assurance. Must also possess at least five years' experience working with software testing; at least one year experience using QTP testing automation tools; and must possess CSTE or equivalent Quality Assurance certification. Any suitable combination of education, training and/or experience would be acceptable.
