

EVENTS AND INTERVIEWS

EVENTS AND INTERVIEWS MANAGEMENT SYSTEM

Events and Interviews allows you to:

- Track and measure ROI of every admissions related event through a single calendar
- Save resources by automating event related emails, including invitations, reminders and more
- Free up staff time for more fact-to-face contact to enhance student experience

Plan events, arrange visits and manage interviews with prospective students seamlessly. Manage the scheduling, registration, and logistics of on and off campus events, interviews and auditions electronically.

We bet that you'll find your institution's overall recruitment calendar filled with all kinds of events. How can you ensure that these events are executed flawlessly and that the valuable information shared comes back to you? Our Events and Interviews solution streamlines your events from initial setup to invitation sending to final execution.

Capture Valuable Information

Don't worry about creating a new database; attendee information, event registrations and interview scheduling data is all fed into your institution's current database, giving you even more comprehensive information about your prospects.

"Advertise" Your Events in a Number of Ways

Concerned about being visible enough? Create links to events directly on your website or online application; send emails that link prospects to an event registration form; and/or let students search for specific events through a branded online web center.
